Description

An exploration device that will function as a search and rescue robot. It will be able to function over rough land terrain, have a camera, a robot arm, and be remotely controlled.

Requirement	Target Measure	Stretch goal
Drone must move over rough/rocky ground	Can drive 10 mph over dirt and large (5x5x5 in. average) smooth rocks.	Y
Display live video.	Live video with less than 3 seconds of delay at a minimum of 10 FPS	Y
Drone must be able to collect samples for later analysis.	Device must be able to manipulate small rocks (3x3x3 in. max, 10 lb)	N
Device must be able to communicate to survivors using a speaker.	Is able to play audio and listen to its environment in a hearable range of 90 db, 2 - 5 kHz from 15 feet away	Y
